Summer 2024

- Ticket checking
- Constant communication
- Assisting with backstage logistics
- Stewarding

PROJECTS

ApexSales CRM — UI (callapp.apexsales.ai)
Primary professional project: full CRM front-end for a sales team platform. Built in React/Next.js, integrating real-time data and custom UI components. Built UI for basically everything that CRM can have.

AI Recipe Finder
Web app that generates personalized recipes via API scraping and AI-driven suggestions.

IELTS Training Platform
Digitalized IELTS exam tests for online practice — content management, timed exercises, and score tracking.

Admin Section
Built admin section for Human Resource Management company at Hackathon.

Custom Board Game
Designed and built an original physical board game — demonstrates creative problem-solving and systems thinking.
Besides all of this, did more than 300 different tasks on different platforms
